ACTIVITY CODES, ORGANIZATIONAL CODES, AND DEFINITIONS USED IN EXTRAMURAL PROGRAMS

INTRODUCTION

This manual contains the code definitions used now and for the past three fiscal years in the **IMPAC** (Information for Management, Planning, Analysis, and Coordination) and **CRISP** (Computer Retrieval of Information on Scientific Projects) systems to identify various aspects of **extramural** research activities of the Department of Health and Human Services (DHHS).

IMPAC and CRISP are online computer-based information systems for many extramural programs of DHHS. IMPAC contains application and award information on extramural programs. As an NIH system, IMPAC specifications and practices may not apply to all DHHS programs. CRISP contains information on funded research only. CRISP derives its administrative data from the IMPAC system. In addition to its IMPAC data, CRISP has project abstracts and indexing terms. The CRISP system also contains summary information on non-IMPAC DHHS intramural research projects.

Extramural research activities are divided into three main mechanisms: grants, contracts and cooperative agreements. A mechanism is the type of funding application or transaction used at the NIH. In general, with grants, investigators are responsible for developing the concepts, methods, and approach for a research project. With contracts, the DHHS awarding unit is responsible for establishing the detailed requirements. With cooperative agreements, both the awarding unit and the recipient have substantial responsibility. Programs are areas within the funding mechanisms for example research, training, fellowships, and cooperative agreements. Activity codes identify categories applied to various funding mechanisms.

INITIAL REVIEW GROUP CODES

Initial Review Groups (IRGs) assess the scientific merit of an application. All IRGs are designated by special acronyms or alphabetical codes, with a maximum of four characters per code. These designations are normally posted to incoming applications upon receipt; for example, "AIDS" is an IRG code that stands for NIAID's Acquired Immunodeficiency Syndrome Research Review Committee. These codes appear frequently in reports and on award statements. Current IRG codes are listed in Table 5 of this manual.

Special Emphasis Panels (SEPs) are chartered Federal advisory committees used for scientific review activities formerly provided by ad hoc groups. SEPs have fluid membership, with members designated to serve for individual meetings rather than formally appointed for fixed terms of service. All SEP committees have a standard IRG code format. The first character will always be a "Z"; the next two characters, the Organization code (Table 2); and the fourth character, the sequential SEP number (1-9) within that ICD.

GRANT APPLICATION/AWARD IDENTIFICATION NUMBERING SYSTEM¹

The identification number is commonly referred to as the application number or grant number, depending upon its processing status. The identification number consists of several parts, each having a distinct meaning. The following example shows the parts of an ID number assigned to an amendment (A1) to a supplemental (Type 3) application for a traditional research project (R01) referred to the National Cancer Institute (CA). The number further identifies the application serially as the 12921st new proposal submitted to the NCI, and indicates that this is the first supplemental application (S1) to the fourth year (-04) of support to this project.

Application	Activity	Administering	Serial		Suffixes
Type	Code	Organization	Number	Grant Year	Other ¹
3	R01	CA	12921	-04	S1A1

Application Type Code - A single-digit code identifying the type of application received and processed. In the example above, the "3" indicates that this is a supplemental request for additional funds. Type code translations are listed in Table 1. More detailed type code definitions are provided in Tables 6 (Grants), 7 (Contracts), and 8 (Agreements).

Activity Code (Also referred to as an Instrument Code) - A three-digit code identifying a specific category of extramural activity. All current activity code titles are listed in Table 3. Activity code definitions are provided in Table 9.

Administering Organization Code (Also referred to as an ICD Code) - A two-letter code identifying the first major-level subdivision. In the example above, "CA" refers to the National Cancer Institute. For certain activities, DHHS organizations having Bureau status may use a Division-level code. An inter-agency agreement awarded by NCI, for instance, may be coded 1Y01CM00999-00, where CM refers to NCI's Division of Cancer Treatment. Administering organization codes are translated in Table 2.

Serial Number - A five-digit number generally assigned sequentially to a series within an Institute, Center, or Division.

Suffixes - A field composed of the following components:

GRANT YEAR - A two-digit number indicates the actual segment or budget period of a project. The grant year number (01, 02, etc.) is preceded by a dash to separate it from the serial number; e.g., AI 12345-02 or CA 00900-04. The grant year number is increased by one for each succeeding renewal year. Thus, the -02 and -04 year suffixes above identify grants in their second and fourth years.

¹ An additional four-digit suffix may appear in a grant identification number recorded in the CRISP system, to identify separate projects.

SUPPLEMENT - The letter "S" and related number identify a particular supplemental record; e.g., S1, S2. Supplement designations follow the grant year or the amendment designation, as the case may be; e.g., AI 12345-01S1 and CA 00900-04A1S2.

AMENDMENT - The letter "A" and related number identify each amended application e.g., A1, A2, etc. Amendment designations follow the grant year or the supplement designation, as the case may be; e.g., DE 34567-02A1 and HL 45678-01S1A2.

ALLOWANCE - The letter "X" and related number identify a fellowship's institutional allowance record. Allowance designations also follow the grant year or other designation; e.g., AG 12345-01X1 and HD 12345-02S1X2.

CONTRACT IDENTIFICATION NUMBERING SYSTEM¹

The contract identification number consists of five parts, each having a distinct meaning. Its elements are structured as follows:

Type of Action	Activity Code	Administering Organization	Serial Number	Modification Number
1	N01	HV	20002	-000

Type of Action Code - A single-digit code identifying the type of contract transaction. In the above example, "1" indicates a new contractual agreement. Type code translations are listed in Table 1. Contract type code definitions are provided in Table 7.

Activity Code (Also referred to as an Instrument Code) - A three-digit code denoting NIH research and research-related contracts. There are seven active research contract activities (N01, N02, N03, N41, N42, N43 and N44), which are listed in Table 3. Definitions of these activities are provided in Table 9.

Administering Organization Code (Also referred to as an ICD Code) - A two-letter code identifying the first major subdivision. In the example above, "HV" refers to the National Heart, Lung, and Blood Institute's Division of Heart and Vascular Diseases. For certain activities, large DHHS organizations with Bureau status may use a first-major-division-level code, as in this example of a contractual agreement awarded by NHLBI through its Division of Heart and Vascular Diseases. These ICD codes are identified in Table 2.

Serial Number - A five-digit number assigned by an ICD's Contracting Office to number sequentially all contracts executed. The first digit indicates the fiscal year in which the contract was initially awarded (e.g., 20002 indicates FY 1992). The last four digits, 0002, indicate the serial number. This is the second new contract awarded by the NHLBI's Division of Heart and Vascular Diseases (HV) in FY 1992.

Modification Number - Following the serial number and separated from it by a dash (-) is the modification number, a two-digit number that indicates the number of modifications of the contract. Modification numbers are assigned sequentially from 00 to 99; the number "00" indicating a new contract; "01," the first modification; "02," the second, etc. There is an exception when a contract's type of action is coded "6." In this instance, 4 digits are used to identify the Task Order number written under a Master Agreement; the next two positions identify the number of modifications of the Task Order.

¹ The numbering of inter-agency/intra-agency agreements is the same as contracts, with the exception of the activity code.

PROCEDURES GOVERNING ACTIVITY CODE AUTHORIZATION AND COORDINATION

The NIH policies and procedures for new activity code assignments are described in "Establishment of New Activities and Activity Codes" - NIH Manual Issuance 4101/6304-2 dated 1992. The reader should consult this document if considering a new activity code.

This Issuance defines activity for the purpose of tracking, special reporting, and accountability as "a broad group or category applied to various NIH funding mechanisms." Activities should not be synonymous with special program areas within the awarding components, but should be broad in nature, transcending Institute scientific programs or program initiatives. They should be sufficiently different from other activities to justify separate identification and accountability.

This code manual is designed to aid the reader in understanding **current** code definitions within the IMPAC system. The IMPAC activity code central tables, however, contain many more activity codes than defined in this manual. Section III of this manual contains a complete listing of DHHS Activity Codes.

The official proposing a new IMPAC code should contact Felicia Shingler, IMPAC Code Manager (301) 435-0996, or E-Mail: Shinglef@OD.NIH.GOV)

PROCEDURES FOR ESTABLISHING OR CHANGING A PEER REVIEW COMMITTEE CODE IN IMPAC

Once a committee code has been established in IMPAC, it is reserved in the central tables and cannot be reassigned. These tables, therefore, contain many more Initial Review Group (IRG) codes than the current codes in Table 5 of this manual. These tables are referenced to determine what unused codes may be assigned to a new committee.

The responsible IC official first contacts Felicia Shingler (301-435-0996, or E-Mail: Shinglef@OD.NIH.GOV.) for assistance in establishing or changing a peer review committee code. The IC official then prepares a memorandum for the record with the following information:

- Full name of proposed committee
- Committee code (cleared in advance)
- Name, address, and phone number of Scientific Review Administrator for the new committee
- Effective date (i.e., Council Round)
- Previous committees (names and codes) or ad hocs that this committee may replace
- Any system change requirements regarding application reassignments
- Appropriate IC contacts and approvals regarding this request
- Reason for change (if applicable)

The IC official sends the memorandum to

- Felicia Shingler
- Code Manager
- User Support Branch
- Division of Extramural Information Systems
- Office of Policy for Extramural Research Administration
- Office of the Director
- 6705 Rockledge Drive 7715
- Room 1020/1125
- Bethesda, MD 20892-9912

Ms. Shingler will initiate the code changes in the IMPAC records as requested and inform staff of the new committee's status. This manual and the Information and Instruction Handbook No. 6-A will reflect these changes. Name changes for committees with existing codes are processed similarly.

ACTIVITY CODES THAT DEFINE THE NIH BUDGET'S RESEARCH GRANT CATEGORY

The NIH Research Grant budget category comprises Research Project Grants (RPGs), Research Center Grants, Small Business Innovative Research - Small Business Technology Transfer Grants (SBIR-STTR), and Other Research Grants. The activity codes for each subcategory are displayed below.

Research Project Grants: RC1, R01, R03, R15, R21, R22, R23, R29, R33, R35, R37, R55, P01, P42, UC1, U19, and NIGMS P41 for FY 1980 through the present; U01 from FY 1993 to the present. Excludes NLM grants for all years, NCRR grants for years prior to FY 1990, and NCNR grants for FY 1986.

Research Center Grants: All P activities (excluding P09, P01, P42, NLM for all years and NCNR for FY 1986) not included in research projects; all M activities; U40, U41, U42, U50, U54; R07 and G12.

Small Business Innovative Research - Small Business Technology Transfer Grants (SBIR-STTR):
R41, R42, R43, R44, U43, U44

Other Research Grants: Grants coded D42, D43, G13, K, P, R, S, or U, and not coded as Projects or Centers.

Note that, despite their similar names, the budget categories differ from the activity code categories. For instance, the budget's Research Projects Grants subcategory contains a different set of activity codes than the R (Research Projects) activity code category.

GENERAL REPORTING CATEGORIES FOUND IN IMPAC

The 5 reporting or purpose categories related to activity codes in the IMPAC system are Research, Training, Health Services, Block and Other. The research, training and health services are used as stated by their names. All "B" activity codes are reported as Block grants. Planning, construction, evaluation and library related programs are reported as Other.

Generally, the first letter of the activity code states the purpose of that code. For example all "T" codes are used for training. However, the first letter does not always represent the purpose of the activity code. Although all "U" codes are cooperative agreements, programs under these codes are used for various purposes, i.e. research, training, or health services.

SECTION I - CODE TRANSLATION FOR GRANTS, CONTRACTS, AND AGREEMENTS

TABLE 1

TYPE OF APPLICATION/TRANSACTION

Code

GRANTS AND COOPERATIVE AGREEMENTS

- 1 New
- 2 Competing Continuation
- 3 Supplement
- 4 Extension
- 5 Noncompeting Continuation
- 6 Change of Institute or Division (new, training programs)
- 7 Change of Grantee or Training Institution
- 8 Change of Institute or Division (noncompeting continuation)
- 9 Change of Institute or Division (competing continuation)

CONTRACTS

- 1 New
- 2 Renewal
- 3 Modification (other than renewal or continuation)
- 4 Letter Contract (temporary code)
- 5 Continuation (incrementally funded contracts only)
- 6 Task Orders and Subsequent Modifications
- 7 Exercise Option

INTER-AGENCY/INTRA-AGENCY AGREEMENTS

- 1 New
- 2 Renewal
- 3 Modification

SECTION II - CODE DEFINITIONS (GRANTS, CONTRACTS, AND AGREEMENTS)

TABLE 6

GRANT AND COOPERATIVE AGREEMENT TYPES - DEFINITION

Code

- | | |
|-----------|---|
| 1 | New - Request for Department of Health and Human Services support of a project that has not yet been funded. |
| 2 | Competing Continuation - Request for an additional term of support based on a funded previous project; must compete for available funds. |
| 3 | Supplement - Request for additional funds for a current award, to cover increased costs (noncompeting) or to expand the scope of work (competing). |
| 4 | Extension - Request for additional funds beyond the years previously awarded; limited to certain activities, including MERIT (R37) and certain Fellowship (F) and Career (K) awards. These F and K applications do not compete for funds. R37's do require National Advisory Council review. |
| 5 | Noncompeting Continuation - Request to pay next budget increment of a current award; does not compete for available funds. |
| *6 | Change of Institute or Division - Request for support (cf. Type 1) of a fellowship or training project that has been transferred from one ICD to another. |
| 7 | Change of Grantee or Training Institution - Request for support of a funded project that has been transferred from one grantee or training institution to another. |
| 8 | Change of Institute or Division - Noncompeting continuation (cf. Type 5) that has been transferred from one ICD to another. |
| 9 | Change of Institute or Division - Competing continuation (cf. Type 2) that has been transferred from one ICD to another. |

* Not on any record in the open or pending file as of October 1994.

TABLE 7

CONTRACT TRANSACTION TYPES - DEFINITION

Code

- 1 New Contract**- New work that defines the specifications, conditions, and negotiated clauses pertaining to a contractual agreement between the Government and a contractor. If any prior agreement exists with the contractor, the contractual document sets forth the scope of work, price, delivery, and additional matters peculiar to the particular procurement, and incorporates by reference or appends the negotiated clauses agreed upon in the prior agreement.
- 2 Renewal** - Supplemental agreement to an existing contract with the incumbent contractor that provides for the performance of additional work similar or identical in nature to that previously required, obligates additional funds, and extends the performance period a minimum of six months (usually one year).
- 3 Modification** - Change Order or Supplemental Agreement not meeting the requirements for a renewal as shown above; however, alters or amends one or more provisions of an existing contract (i.e., extensions of less than six months, overhead adjustments, and/or obligation of additional funds with or without extending the contract).
- 4 Letter Contract** - Written preliminary contractual document that authorizes immediate commencement of work and stipulates maximum fund obligations that may be incurred prior to negotiation of a definitive contract. A letter contract will be superseded by a definitive contract at the earliest possible date, usually within 90 days.
- 5 Continuation of an Incrementally Funded Contract** - Supplemental Agreement that allocates funds for the next increment of work to be performed under a multiple-year, incrementally funded contract, and stipulates the additional time period covered by such funds. The code should not be used to report contract extensions that do not require additional funds to cover the extensions (see Code 3 above).
- 6 Task Orders and Subsequent Modifications (Relating to Existing Basic Ordering Agreements)** - An order placed under an existing Basic Ordering Agreement that specifies the delivery schedule and the obligation of funds. Code 6 is used to report both the initial Task Order and any subsequent modifications to the Task Orders.
- 7 Exercise of Option** - Action taken to implement the Government's right to require the contractor to accomplish work under the contract as negotiated in the original contract. Further negotiation is not necessary, since the original contract included the potential requirement.

TABLE 8

INTER-AGENCY/INTRA-AGENCY AGREEMENT TRANSACTION TYPES -DEFINITION

Code

- | | |
|----------|--|
| 1 | New - A document covering a new work requirement that defines the specifications and conditions agreed upon between the Government agencies involved. |
| 2 | Renewal - A continuation to an existing inter-agency/intra-agency agreement that provides for the performance of new or additional work similar or identical in nature to that previously required, obligates additional funds, and extends the performance period by more than six months. |
| 3 | Modification - Altering or amending one or more provisions of an existing inter-agency/intra-agency agreement. (Includes extensions of performance periods by less than six months, with or without funds to cover the period of extension.) |

TABLE 9

ACTIVITY CODE DEFINITIONS

Training Programs

A 03 General Purpose Traineeship Grants to Schools of Public Health (BHP)

To enable the schools of public health accredited by the American Public Health Association to award traineeships to students enrolled in the schools.

A 11 Professional Nurse Traineeship Program (Long-Term) (BHP)

To increase the number of graduate nurses training on a long-term basis for positions as administrators, supervisors, nursing specialists, and teachers in hospitals and related institutions, public health agencies, and schools of nursing.

A 19 Traineeships for Students in Other Graduate Programs (BHP)

To provide traineeship grants to public or nonprofit private educational entities (excluding accredited schools of public health) which offer accredited graduate programs in health administration, hospital administration or health policy analysis and planning. In awarding traineeships, applicants must assure that at least 80% of funds received shall go to individuals who a) have previously received a postbaccalaureate degree, or b) have three years of work experience in health services.

A 22 Nurse Anesthetist Traineeship Program (BHP)

To increase the number of nurse anesthetists by providing traineeships for registered nurses in nurse anesthetist training programs. Grants will be made to public or nonprofit private institutions providing accredited training or licensed registered nurses to be nurse anesthetists.

A 24 Minority Faculty Fellowship Program (MFFP)

To increase the number of underrepresented minority faculty members in health professions schools and other public or private health or educational entities. The grant awards are intended to allow institutions that demonstrate a commitment and ability to identify, recruit, and select underrepresented minorities in health professions an opportunity to provide a fellowship to individuals who have the potential for teaching, administering programs or conducting research as faculty members.

Research Construction Programs

C 06 Research Facilities Construction Grants

To provide matching Federal funds, up to 75%, for construction or major remodeling, to create new research facilities. In addition to basic research laboratories this may include, under certain circumstances, animal facilities and/or limited clinical facilities where they are an integral part of an overall research effort.

Training Projects

D 10 Nursing Special Project Grants (BHP)

To assist any public or nonprofit private agency, organization, or institution to meet the costs of special projects to plan, develop, or establish new programs or modifications of existing programs of nursing education or to effect significant improvements in curriculums of schools of nursing or for research in the various fields of nursing education; to assist in otherwise strengthening, improving or expanding programs of nursing education or to assist any such agency, organization or institution to meet the costs of other special projects which will help to increase the supply of adequately trained nursing personnel.

D 15 Grants for Training in Family Medicine (BHP)

To provide support to public or nonprofit private hospitals to plan, develop, and operate an approved professional training program in the field of family medicine. Funds may be awarded for the expansion and improvement of approved residency training programs in family medicine and for the support of residents in family medicine.

D 18 Special Health Career Opportunity Grants (BHP)

To identify and increase admissions to and enrollment in schools of medicine, dentistry, osteopathy, optometry, podiatry, pharmacy, veterinary medicine, public health, or health training of individuals whose background and interests make it reasonable to assume that they will engage in the practice of their health profession in rural or other areas experiencing a severe shortage of personnel in such fields. These grants will identify individuals with a potential for education or training in the health professions who due to socioeconomic factors are financially or otherwise disadvantaged to undertake such postsecondary education or training as may be required to qualify them to enroll in such a school.

D 19 Grants for Utilization of Nursing Educational Talent (BHP)

To identify individuals with a potential for nurse's training and encourage such individuals to undertake professional nurse's training or become qualified to undertake such training and to establish programs to enhance and facilitate the enrollment of identified individuals.

D 21 Grants for Programs for the Training of Physician's Assistants (BHP)

To assist schools of medicine, osteopathy, and other public or nonprofit private entities to meet the cost of planning, developing, and operating or maintaining eligible programs for the training of Physician's Assistants.

D 23 Advanced Nurse Education Programs (BHP)

To provide support to public and nonprofit private collegiate schools of nursing to 1) plan, develop, and operate; 2) significantly expand; or 3) maintain existing programs for the advanced training of professional nurses to teach in the various fields of nurse's training; to serve in administrative or supervisory capacities; or to serve in other professional nursing specialties (including service as nurse clinicians) determined by the Secretary to require advanced training.

D 24 Nurse Practitioners Training Programs (BHP)

To provide support to public and nonprofit private schools of nursing, medicine and public health; public or nonprofit hospitals; and other public or nonprofit entities to 1) plan, develop and operate; 2) significantly expand; or 3) maintain existing programs for the training of nurse practitioners. Programs for the training of nurse practitioners means educational programs for registered nurses (irrespective of the type of school of nursing in which the nurses received their training) which meet guidelines prescribed by the Secretary.

D 28 Grants for Residency Training in General Internal Medicine and General Pediatrics (BHP)

To provide financial assistance (including resident support) to schools of medicine and osteopathy to plan, develop, and operate approved residency programs in internal medicine or pediatrics emphasizing training for practice in general internal medicine or general pediatrics.

D 30 Grants for Residency Training in the General Practice of Dentistry (BHP)

To provide assistance to any public or nonprofit private school of dentistry or accredited postgraduate dental training institution to 1) plan, develop, and operate an approved residency program in the general practice of dentistry; and 2) provide financial assistance to residents in such a program who need such assistance and who plan to specialize in the practice of general dentistry.

D 31 Curriculum Development Grants (BHP)

To provide assistance to health professions, allied health or nurse training institutions or nonprofit private entities for a variety of health manpower projects and programs, such as interdisciplinary educational programs in applied nutrition, geriatrics, and training in occupational and environmental health factors for future primary care physicians.

D 32 Grants for Establishment of Departments of Family Medicine (BHP)

To provide support to schools of medicine and osteopathy to meet the costs of projects to establish and maintain academic administrative units (which may be departments, divisions, or other units) to provide clinical instruction in family medicine.

D 33 Preventive Medicine Residency Training Grants (BHP)

To provide assistance to schools of medicine, osteopathy, and public health for planning and developing new residency training programs and maintaining or improving existing residency training programs in preventive medicine and to provide financial assistance to residency trainees enrolled in such programs.

D 34 Centers for Excellence in Minority Health Education Grants (BHP)

To provide grants to certain predominantly minority health professions schools to assist such schools in supporting programs of excellence in health professions education for minority individuals. Grant may be used to 1) develop plans for institutional improvements, 2) improve faculty recruitment and retention, 3) improve access to library and information resources, 4) enhance student academic performance, 5) increase the number and quality of student applicants and 6) develop curricula and carry out faculty training programs.

D 35 AIDS Regional Education and Training Centers Grants

To provide grants to health profession schools, hospitals, health departments and other organizations to develop AIDS Regional Education and Training Centers which will provide training for health care personnel in the care of people with AIDS and other conditions related to infection with the Human Immunodeficiency Virus (HIV).

D 36 Interdisciplinary Training for Health Care for Rural Areas

To provide grants to local health departments, nonprofit organizations and public or nonprofit colleges, universities, or schools of, or programs that specialize in nursing, psychology, social work, optometry, public health, dentistry, osteopathy, physicians assistants, pharmacy, podiatry, medicine, chiropractic, and allied health professions to 1) use new and innovative methods to train health care practitioners to provide services in rural areas, 2) demonstrate and evaluate innovative interdisciplinary methods and models designed to provide access to cost effective comprehensive health care, 3) deliver health care services to individual residing in rural areas, 4) enhance the amount of relevant research conducted concerning health care issues in rural areas and 5) increase the recruitment and retention of health care practitioners in rural areas and make rural practice a more attractive career choice for health care practitioners.

D 37 Allied Health Special Project Grants (BHP)

To provide grants to schools, universities or other public or nonprofit private educational entities which provide for allied health personnel education and training for 1) improving and strengthening the effectiveness of allied health administration, program directors, faculty, and clinical faculty; 2) improving and expanding program enrollments in those professions in greatest demand and whose services are most needed by the elderly; 3) promoting the effectiveness of allied health practitioners in geriatric assessment and the rehabilitation of the elderly through interdisciplinary training programs; 4) emphasizing innovative models to link allied health clinical practice, education and research; 5) adding and strengthening curriculum units in allied health programs to include knowledge and practice concerning prevention and health promotion, geriatrics, long-term care, home health and hospice care, and ethics and 6) the recruiting individuals into allied health professions.

D 38 Public Health Special Projects (BHP)

To provide grants to schools of public health for planning, development, demonstrating, operating, and evaluating projects for 1) preventive medicine 2) health promotion and disease prevention 3) increasing the enrollment in such schools of individuals from disadvantaged backgrounds and 4) to improve access and quality in health care.

D 39 Health Education and Training Centers (HETC) Programs (BHP)

To provide grants to allopathic and osteopathic (M.D. and D.O.) medical schools for planning, developing, establishing, and maintaining Health Education Training Centers (HETCs) to improve the supply, distribution, quality and efficiency of personnel providing health services 1) in the United States along the Border between the United States and Mexico; 2) in other urban and rural areas (including Frontier areas of the United States) to any population group, including Hispanic individuals, that has demonstrated serious unmet health care needs; and to 3) encourage health promotion and disease prevention through public education in the areas described.

D 43 International Training Grants in Epidemiology

To improve and expand epidemiologic research and the utilization of epidemiology in clinical trials and prevention research in foreign countries through support of training programs for foreign health professionals, technicians, and other health care workers.

Health Professions Programs

E 10 Grants for Graduate Programs in Health Administration (BHP)

To provide grants to public or nonprofit private educational entities (excluding accredited schools of public health) to support accredited graduate educational programs in health administration, hospital administration, and health planning.

Fellowship Programs

F 05 **International Research Fellowships (FIC)**

To provide collaborative research opportunities for qualified non-immigrant alien scientists who hold a doctoral degree or its equivalent in one of the biomedical or behavioral sciences.

F 06 **Senior International Fellowships (FIC)**

To provide opportunities to outstanding mid-career faculty members from U.S. schools of medicine, osteopathy, dentistry, and public health with demonstrated productive scholarship and recognized stature in their profession to go abroad to study and share their expertise.

F 07 **NIH-French CNRS Program for Scientific Collaboration (FIC)**

Under an agreement between NIH and the French National Center for Scientific Research (CNRS) both organizations share the support of well qualified U.S. scientists selected to work at laboratories in France and similarly qualified French scientists selected to work at U.S. laboratories for periods of 6 months or longer. U.S. participants must have a doctorate in one of the biomedical sciences or a related field, and professional experience for at least two of the last four years in the health or biomedical fields appropriate to the proposed study.

F 15 **Scholars-in-Residence Program (FIC)**

To facilitate the exchange of ideas among distinguished science leaders and scholars who will spend from 3 to 12 months in residence at NIH.

F 20 **Foreign Funded Fellowships (FIC)**

Postdoctoral Fellowships administered by Fogarty International Center for U.S. scientists who wish to pursue collaborative research projects in Germany, Finland, France, Ireland, Israel, Japan, Norway, Sweden, Switzerland or Taiwan.

F 30 **Individual Predoctoral NRSA for M.D./Ph.D. Fellowships (ADAMHA)**

Individual fellowships for predoctoral training which leads to the combined M.D./Ph.D. degrees.

F 31 **Predoectoral Individual National Research Service Award**

To provide predoctoral individuals with supervised research training in specified health and health-related areas leading toward the research degree (e.g., Ph.D.).

- F 32 **Postdoctoral Individual National Research Service Award**
- To provide postdoctoral research training to individuals to broaden their scientific background and extend their potential for research in specified health-related areas.
- F 33 **National Research Service Awards for Senior Fellows**
- To provide opportunities for experienced scientists to make major changes in the direction of research careers, to broaden scientific background, to acquire new research capabilities, to enlarge command of an allied research field, or to take time from regular professional responsibilities for the purpose of increasing capabilities to engage in health-related research.
- F 34 **MARC NRSA Faculty Fellowships**
- To provide fellowships to selected faculty members from minority institutions to enable them to obtain advanced training in specified health and health-related areas.
- F 35 **Intramural NRSA Individual Postdoctoral Program Appointee**
- For support of an individual postdoctoral trainee appointed for research training in the Intramural NRSA Research Training Program.
- F 36 **MARC Visiting Scientists Program (Grant) (NIGMS) <Title Revised>**
- To strengthen research and teaching programs in the biomedical sciences for the benefit of students and faculty by drawing upon the special talents of scientists of other institutions.
- F 37 **Medical Informatics Fellowship (NLM)**
- To provide training to individuals in the synthesis, organization, and management of knowledge. The training should be interdisciplinary - involving medicine, biotechnology, and cognitive sciences, information science, and computer science.
- F 38 **Applied Medical Informatics Fellowship <Title/Definition Revised>**
- To provide opportunities for scientists to make major changes in the direction of research careers for the purpose of engaging in the synthesis, organization, and management of knowledge.

Resource Programs

- G 07 **Resources Improvement Grant**
- A nonrenewable grant to establish a library or expand or improve present libraries which have inadequate resources relative to their needs and user population.
- G 08 **Resources Project Grant (NLM)**
- For institutions with medical libraries which meet minimal standards in terms of staff, collection, and institutional support and propose a plan for the improvement of services as opposed to the acquisition of basic resources.
- G 11 **Extramural Associate Research Development Award (EARDA)**
- To provide funds to institutions eligible to participate in the NIH Extramural Associates Program for establishing or enhancing an office of sponsored research and for other research infrastructure needs.
- G 12 **Research Centers in Minority Institutions Award**
- To assist predominantly minority institutions that offer the doctorate in the health professions and/or health-related sciences in strengthening and augmenting their human and physical resources for the conduct of biomedical research.

G 13 Health Sciences Publication Support Awards (NLM)

To provide short-term assistance for the preparation of book-length manuscripts about important scientific information needed by U.S. health professionals. Grants are awarded for major critical reviews and analyses of historical studies and current developments in informatics, technology, librarianship, and secondary reference materials in the biomedical field. Publication in formats other than print-on-paper (e.g., electronic, film, etc.) are encouraged, as are new and innovative ways of organizing and presenting information. Publication grants do not support journals or other serials and are not suitable for operation of established databases. Work judged to have significant commercial viability will not be supported by these grants

G 20 Grants for Repair, Renovation and Modernization of Existing Research Facilities (NCRR)

To provide funds for major repair, renovation, and modernization of existing research facilities. These facilities may be the clinical research facilities, animal research facilities, and other related research facilities.

Health Services Programs

H D1 Demonstration for Prevention of Alcohol and Other Drug Abuse Among High-Risk Youth (SAMHSA)

Provides financial assistance to public or nonprofit organizations for client-oriented demonstration projects in prevention of alcohol and other drug abuse among high-risk youth; programs will be targeted toward decreasing incidence and prevalence, identifying risk factors, and increasing resiliency and protective factors to reduce risk.

H D2 Demonstration: Model Substance Abuse Prevention Projects for Pregnant and Postpartum Women and Their Infants

Provides financial assistance to eligible organizations for demonstration of model projects for pregnant and postpartum women and their infants; projects will promote involvement, coordination and integration of comprehensive mental health and substance abuse services for alcohol and drug-using pregnant and postpartum women and their families, and work toward reduction of related problems in such families and children. (PHS Act, Sec. 509F/G.)

H D4 Drug Use and Alcohol Abuse Prevention Demonstration Grants in the Community Partnership Study Program (SAMHSA) <modified description>

Provides financial assistance to local governments and/or local private non-profit organizations, designated to act on behalf of larger coalitions, to demonstrate models for elimination of alcohol and other drug abuse, especially by development of partnerships to encourage various individuals and groups in a community to more effectively coordinate prevention programs and to develop prevention initiatives; and to demonstrate the effectiveness of such community-based groups in prevention and early intervention. The Community Prevention Coalitions Demonstration (CPCD) program is included in this activity code.

H D5 Demonstrations: Community-Based Mental Health Services for Adults with Serious Mental Illness and Children with Serious Emotional Disturbances (SAMHSA) <adjusted description>

Provides financial assistance to State or local mental health authorities to promote the development and effectiveness of community support systems for the long-term mentally ill, and for seriously emotionally disturbed children and adolescents, and to facilitate consumer and family involvement in community mental health service planning. The Community Support Program (CSP), the Child and Adolescent Service System Program (CASSP), and the Statewide Family-Controlled Information and Support Networks Program are included in this activity code.

H D7 Demonstration: Model Comprehensive Drug Abuse Treatment Program for Critical Populations

Provides financial assistance to State and territorial agencies to improve existing programs for drug abuse treatment for critical populations (adolescents, women, minorities, public housing residents and rural/migrant workers). (PHS Act, Sec.510.)

- H D8 Demonstration: Residential Drug Treatment Program for Women and Their Children (SAMHSA)**
- Provides financial assistance to eligible health services organizations for comprehensive substance abuse treatment services--including housing, medicine, training, employment counseling, and case management--in residential settings for women and their children.
- H D9 Mental Health and/or Substance Abuse Services Demonstration Grants (SAMHSA)**
- To provide financial assistance to eligible organizations for demonstration of model projects for the prevention and/or treatment of mental illness and/or substance abuse disorders.
- H R1 State Mental Health and Substance Abuse Data Resource Projects (SAMHSA)**
- Provides financial assistance to State and territorial agencies for development or improvement of State alcohol, drug abuse, or mental health service or treatment-related resources, including integrated data collection systems, which support operation of mental health or substance abuse systems. The Mental Health Statistics Improvement Program is under this activity code.
- H R2 Addiction Treatment Capacity Expansion Program**
- Provides financial assistance to State agencies for alcohol and drug abuse (and indirectly to subapplicants within each State) for improved health services resources ; creation of new addiction treatment capacity in high-incidence jurisdictions for high-risk populations, with expansion of the program to other populations as new authorizations permit.
- H S1 Model Comprehensive Substance Abuse Treatment Programs for Correctional Populations**
- Provides financial assistance to State and territorial agencies to enhance drug treatment for criminal and juvenile justice populations, including prisons, jails, probation and parole and juvenile institutions, especially for model approaches that link treatment to the criminal justice system. (PHS Act, Sec.511.)
- H S2 Model Comprehensive Substance Abuse Treatment Programs for Non-Incarcerated Criminal and Juvenile Justice Populations**
- Provides financial assistance to State and territorial agencies to enhance drug treatment for non-incarcerated criminal and juvenile justice populations, as well as court diversion to treatment, especially for model approaches that link treatment to the criminal justice system. (PHS Act, Sec.511.)
- H S4 Residential Treatment Program for Pregnant and Postpartum Women (SAMHSA)**
- Provides financial assistance to eligible recipients to support projects for the delivery or improvement of residential drug and alcohol abuse treatment services for pregnant or postpartum women.
- H S5 Child Mental Health Services Initiative: Comprehensive Community Mental Health Services for Children and Adolescents with Serious Emotional Disturbances (SAMHSA)**
- Provides financial assistance to eligible health organizations for development of integrated systems of services for children and adolescents with serious emotional disturbances.
- H S6 Managed-Care Models for SSI Beneficiaries Disabled Due to Alcohol or Other Drug Addiction (SAMHSA)**
- Provides financial assistance to eligible State agencies to support projects to develop or evaluate model approaches of referral and monitoring of individuals disabled due to addictive disorders.
- H 07 Mental Health Disaster Assistance**
- Grants to enable public or other nonprofit agencies to provide counseling and training to victims of major disasters to relieve mental health problems caused or aggravated by such disasters or their aftermath.

- H 1N **HIV/AIDS Community-Based Outreach and Intervention Demonstration Program for Substance Abusers**
Provides financial assistance to States and territories to support outreach efforts to high-risk substance abusers, to modify behaviors and produce changes in incidence of HIV/AIDS and related diseases in these populations.
- H 1S **Grants for Disaster Relief Relating to SAMHSA Programs**

Provides financial assistance to eligible State health departments impacted by designated natural disasters to assess the health threats and address health issues associated with the disaster, and to restore SAMHSA-related public health programs that were impacted by the disaster.
- H 13 **Conferences (SAMHSA)**

To support international, national, or regional conferences, symposiums, or workshops dealing with services for the rehabilitation, prevention, and treatment of categorical diseases.
- H 2N **Demonstration: Linking Community-Based Primary Care, Substance Abuse, and HIV/AIDS Treatment Services**

Provides financial assistance to public or private non-profit organizations to strengthen the linkages between primary health care and the alcohol, drug abuse, and mental health treatment systems; must include HIV/AIDS testing, counseling, prevention, and treatment. (PHS Act, Sec.510.)
- H 67 **Conferences on Minority Male Health and Human Services Issues (OMH)**

To support meetings and conferences on health and human service problems confronting high-risk minority males; for information dissemination and education transfer involving service organizations and the general public; and for development of strategies to meet the health and human service needs of high-risk minority male populations and targeted communities, especially through community outreach.
- H 79 **Mental Health and/or Substance Abuse Services Grants (SAMHSA)**

To support services and other activities for the prevention and/or treatment of mental illness and/or substance abuse disorders and/or for the promotion of health.
- H 86 **Prevention Grants (SAMHSA)**

To support demonstrations or other activities for the prevention of disease or of dysfunctional behavior, or for the promotion of health.
- H 87 **Treatment Grants (SAMHSA)**

To support projects for the delivery of improvement of treatment services for categorical diseases.

Research Career Programs

- K D1 **Mental Health and/or Substance Abuse KD&A Grants (SAMHSA)**

To provide support to develop new knowledge about ways to improve the prevention and/or treatment of substance abuse and/or mental illness, and to work with State and local governments as well as providers, families, and consumers to apply that knowledge effectively in everyday practice. Outcome measures are the heart and core of the KD&A program. KD&As do not provide operating funds for service programs, except as required by the knowledge development activity.
- K 01 **Research Scientist Development Award - Research & Training**

For support of a scientist, committed to research, in need of both advanced research training and additional experience.

K 02 Research Scientist Development Award - Research

For support of a scientist, committed to research, in need of additional experience.

K 04 Modified Research Career Development Awards

To foster the development of young scientists with outstanding research potential for careers of independent research in the sciences related to health. This applies only when the application for the initial award was received after July 1, 1967.

K 05 Research Scientist Award

For the support of a research scientist qualified to pursue independent research which would extend the research program of the sponsoring institution, or to direct an essential part of this research program.

K 06 Research Career Awards

To enable institutions to finance positions favorable to the intellectual growth and research productivity of established investigators of high competence for the duration of their careers.

K 07 Academic/Teacher Award (ATA)

To create and encourage a stimulating approach to disease curricula that will attract high quality students, foster academic career development of promising young teacher-investigators, develop and implement excellent multidisciplinary curricula through interchange of ideas and enable the grantee institution to strengthen its existing teaching program.

K 08 Clinical Investigator Award (CIA)

To provide the opportunity for promising medical scientists with demonstrated aptitude to develop into independent investigators, or for faculty members to pursue research aspects of categorical areas applicable to the awarding unit, and aid in filling the academic faculty gap in these shortage areas within health profession's institutions of the country.

K 11 Physician Scientist Award (Individual) (PSA)

For support to a newly trained clinician nominated by an institution for development of independent research skills and experience in a fundamental science.

K 12 Physician Scientist Award (Program) (PSA)

For support to a newly trained clinician appointed by an institution for development of independent research skills and experience in a fundamental science within the framework of an interdisciplinary research and development program.

K 14 Minority School Faculty Development Awards

To encourage the development of faculty investigators at minority schools and to enhance their research capabilities in specified health and health related areas.

K 15 Dentist Scientist Award (Individual)

To provide support for dentists with a strong commitment to oral health research to develop into independent biomedical investigators. Primarily, for support to a newly trained dentist nominated by an institution for development of independent research skills through a three phase program: advanced basic science development, advanced clinical science development, and a research experience component.

K 16 Dentist Scientist Award (Program)

To provide support for dentists with a strong commitment to oral health research to develop into independent biomedical investigators. Primarily, for support to a newly trained dentist appointed by an institution for development of independent research skills through a three phase program: advanced basic science development, advanced clinical science development, and a research experience component.

K 17 Research Career Re-Entry Program

To provide support to basic or clinical scientists when re-entering active careers in science or academic medicine. This postdoctoral award is designed to support individuals who would have high potential as basic or clinical researchers if enabled to update their research skills.

K 20 Scientist Development Award for Clinicians

To foster the development of outstanding scientists with potential to make important contributions to the fields of alcoholism, drug abuse or mental health (ADM) research. Primarily intended to provide supervised research experience for clinically trained individuals, especially physicians, who show special promise for a research career but do not possess sufficient research skills.

K 21 Scientist Development Award

To foster the development of outstanding scientists with potential for making important contributions to the fields of alcoholism, drug abuse or mental health (ADM) research. Primarily intended to meet the need for supervised research experience for highly promising biological or behavioral scientists who need further supervised research experience.

K 22 Career Transition Award

To provide support to outstanding newly trained basic or clinical investigators to develop their independent research skills through a two phase program; an initial period involving and intramural appointment at the NIH and a final period of support at an extramural institution. The award is intended to facilitate the establishment of a record of independent research by the investigator in order to sustain or promote a successful research career.

K 23 Mentored Patient-Oriented Research Career Development Award

To provide support for the career development of investigators who have made a commitment of focus their research endeavors on patient-oriented research. This mechanism provides support for a 3 year minimum up to 5 year period of supervised study and research for clinically trained professionals who have the potential to develop into productive, clinical investigators.

K 24 Midcareer Investigator Award in Patient-Oriented Research

To provide support for the clinicians to allow them protected time to devote to patient-oriented research and to act as mentors for beginning clinical investigators.

K 25 Mentored Quantitative Research Career Development Award

To engender and foster such activities by supporting the career development of investigators with quantitative scientific and engineering backgrounds outside of biology or medicine who have made a commitment to focus their research endeavors on behavioral and biomedical research (basic or clinical). This mechanism is aimed at research-oriented scientists with experience at the level of junior faculty (e.g., early to mid-levels of assistant professor or research assistant professor ranks). This award provides support for a period of mentored study and research for professionals with such backgrounds who have the potential to integrate their expertise with biomedicine and develop into productive investigators.

Examples of quantitative scientific and technical backgrounds outside of biology or medicine considered appropriate for this award include, but are not limited to: mathematics, statistics, computer science, informatics, physics, chemistry, and engineering.

K 26 Midcareer Investigator Award in Biomedical and Behavioral Research

The purpose of the Midcareer Investigator Award in Biomedical and Behavioral Research is to provide grant support for biomedical and behavioral scientists to allow them protected time to devote to their research and mentoring.

K 30 Clinical Research Curriculum Award (CRCA)

The CRCA is an award to institutions and is intended to stimulate the inclusion of high-quality, multi-disciplinary didactic training as part of the career development of clinical investigators. This award is intended to support the development of new didactic programs in clinical research at institutions that do not currently offer such programs or, in institutions with existing didactic programs in clinical research to support or expand their programs or to improve the quality of instruction.

General Clinical Research Centers Program

M 01 General Clinical Research Centers Program

An award made to an institution solely for the support of a General Clinical Research Center where scientists conduct studies on a wide range of human diseases using the full spectrum of the biomedical sciences. Costs underwritten by these grants include those for renovation, for operational expenses such as staff salaries, equipment, and supplies, and for hospitalization. A General Clinical Research Center is a discrete unit of research beds separated from the general care wards.

Research and Development-Related Contracts

N 01 Research and Development Contracts

To develop and/or apply new knowledge or to test, screen, or evaluate a product, material, device, or component for use by the scientific community.

N 02 Resource and Support Contracts - Awarded in the ICD

To support intramural and extramural station support needs. This activity also includes the provision of resources to intramural research programs.

N 03 Station Support Contracts - Awarded by the Division of Procurement

To contract for the spectrum of supplies, support services, audiovisual services, Architect-Engineering (A&E) services, construction, and equipment supporting the operating needs of the NIH accomplished through negotiated procedures or by sealed bidding.

N 43 Small Business Innovation Research - Phase I (Contract)

To support project, limited in time and amount, to establish the technical merit and feasibility of R&D ideas which may ultimately lead to a commercial product(s) or service(s). These contracts may be made only with small businesses.

N 44 Small Business Innovation Research - Phase II (Contract)

To support in-depth development of R&D ideas whose feasibility has been established in Phase I and which are likely to result in commercial products or services. These contracts may be made only to small businesses.

Research Program Projects and Centers

P 01 Research Program Projects

For the support of a broadly based, multidisciplinary, often long-term research program which has a specific major objective or a basic theme. A program project generally involves the organized efforts of relatively large groups, members of which are conducting research projects designed to elucidate the various aspects or components of this objective. Each research project is usually under the leadership of an established investigator. The grant can provide support for certain basic resources used by these groups in the program, including clinical components, the sharing of which facilitates the total research effort. A program project is directed toward a range of problems having a central research focus, in contrast to the usually narrower thrust of the traditional research project. Each project supported through this mechanism should contribute or be directly related to the common theme of the total research effort. These scientifically meritorious projects should demonstrate an essential element of unity and interdependence, i.e., a system of research activities and projects directed toward a well-defined research program goal.

P 20 Exploratory Grants

To support planning for new programs, expansion or modification of existing resources, and feasibility studies to explore various approaches to the development of interdisciplinary programs that offer potential solutions to problems of special significance to the mission of the NIH. These exploratory studies may lead to specialized or comprehensive centers.

P 30 Center Core Grants

To support shared resources and facilities for categorical research by a number of investigators from different disciplines who provide a multidisciplinary approach to a joint research effort or from the same discipline who focus on a common research problem. The core grant is integrated with the center's component projects or program projects, though funded independently from them. This support, by providing more accessible resources, is expected to assure a greater productivity than from the separate projects and program projects.

P 40 Animal (Mammalian and Nonmammalian) Model, and Animal and Biological Material Resource Grants (NCRR)

To develop and support animal (mammalian and nonmammalian) models, or animal or biological materials resources available to all qualified investigators without regard to the scientific disciplines or disease orientations of their research activities or specifically directed to a categorical program. Nonmammalian resources include nonmammalian vertebrates, invertebrates, cell systems, and nonbiological systems.

P 41 Biotechnology Resource Grants

To support biotechnology resources available to all qualified investigators without regard to the scientific disciplines or disease orientations of their research activities or specifically directed to a categorical program area.

P 42 Hazardous Substances Basic Research Grants Program (NIEHS)

To support basic research directed towards understanding and attenuating the public health effects resulting from exposure to hazardous substances, including 1) advanced techniques for detection, assessment and evaluation of the effects on human health of hazardous substances; 2) methods to assess risks to human health presented by hazardous substances; 3) methods and technologies to detect hazardous substances in the environment and 4) basic biological, chemical, and physical methods to reduce the amount and toxicity of hazardous substances. This special program, authorized under Superfund legislation, is for a broadly based, multi-disciplinary research effort which must include biomedical research components and which may include research components related to engineering, hydrogeology, ecology and epidemiology so long as they are linked to basic biomedical science. Each research project is generally under the leadership of an established investigator. The grant can provide support for certain basic resources used by the groups in the program (cores), including an administrative structure for effective coordination.

P 50 Specialized Center

To support any part of the full range of research and development from very basic to clinical; may involve ancillary supportive activities such as protracted patient care necessary to the primary research or R&D effort. The spectrum of activities comprises a multidisciplinary attack on a specific disease entity or biomedical problem area. These grants differ from program project grants in that they are usually developed in response to an announcement of the programmatic needs of an Institute or Division and subsequently receive continuous attention from its staff. Centers may also serve as regional or national resources for special research purposes.

P 51 Primate Research Center Grants (NCRR)

To support centers which include a multidisciplinary and multi-categorical core research program using primate animals and to maintain a large and varied primate colony which is available to affiliated, collaborative, and visiting investigators for basic and applied biomedical research and training.

P 60 Comprehensive Center

To support a multipurpose unit designed to bring together into a common focus divergent but related facilities within a given community. It may be based in a university or may involve other locally available resources, such as hospitals, computer facilities, regional centers, and primate colonies. It may include specialized centers, program projects and projects as integral components. Regardless of the facilities available to a program, it usually includes the following objectives: to foster biomedical research and development at both the fundamental and clinical levels; to initiate and expand community education, screening, and counseling programs; and to educate medical and allied health professionals concerning the problems of diagnosis and treatment of a specific disease.

P 79 Community Action Grants for Health Service System Change (SAMHSA)

To provide financial assistance to State and local governments and tribal organizations to stimulate the adoption of exemplary services practices through convening partners, building consensus, aiding in eliminating barriers, decision-support, adaptation of service models to meet local needs, and planning the implementation of such practices. Does not directly support health service delivery.

Research Projects

R C1 **NIH Challenge Grants and Partnerships Program - Phase I (NIAID)**

To promote the development of joint ventures between the NIH and both domestic and global entities to facilitate rapid implementation of R&D in biomedical or biotechnology projects for infectious diseases that benefit public health and have a commercial potential that otherwise could not have been attained without matching funds.

Essential elements of grantee responsibility would include the specification of : 1) interim research and development of target goals upon whose achievement funds would be incrementally released to the awardee; 2) a single principle investigator who would be scientifically and administratively responsible for the project's research and development, and 3) a single applicant organization that would be legally and financially responsible for the funds awarded.

R 01 **Research Project**

To support a discrete, specified, circumscribed project to be performed by the named investigator(s) in an area representing his specific interest and competencies.

R 03 **Small Research Grants**

To provide research support specifically limited in time and amount for studies in categorical program areas. Small grants provide flexibility for initiating studies which are generally for preliminary short-term projects and are non-renewable.

R 09 **Scientific Evaluation**

To provide the chairman of an initial review group funds for operation of the review group.

R 10 **Cooperative Clinical Research (Grants)**

To support clinical evaluation of various methods of therapy and/or prevention in specific disease areas. These represent cooperative programs between participating institutions and principal investigators, and are usually conducted under established protocols.

R 13 **Conference**

To support recipient sponsored and directed international, national or regional meetings, conferences and workshops.

R 15 **Academic Research Enhancement Awards (AREA)**

To support small scale research projects conducted by faculty in primarily baccalaureate degree-granting domestic institutions. Awards are for up to \$75,000 for direct costs (plus applicable indirect costs) for periods not to exceed 36 months.

R 18 **Research Demonstration and Dissemination Projects**

To provide support designed to develop, test, and evaluate health service activities, and to foster the application of existing knowledge for the control of categorical diseases.

R 21 **Exploratory/Developmental Grants**

To encourage the development of new research activities in categorical program areas. (Support generally is restricted in level of support and in time.)

R 23 **New Investigator Research Awards**

To support basic and clinical studies so that newly trained investigators might remain active during the developmental stage of their career.

- R 24 **Resource-Related Research Projects**
- To support research projects that will enhance the capability of resources to serve biomedical research.
- R 25 **Education Projects**
- For support to develop and/or implement a program as it relates to a category in one or more of the areas of education, information, training, technical assistance, coordination, or evaluation.
- R 29 **First Independent Research Support and Transition (FIRST) Award**
- To provide a sufficient initial period of research support for newly independent biomedical investigators to develop their research capabilities and demonstrate the merit of their research ideas.
- R 33 **Exploratory/Developmental Grants Phase II**
- The R33 award is to provide a second phase for the support for innovative exploratory and development research activities initiated under the R21 mechanism. Although only R21 awardees are generally eligible to apply for R33 support, specific program initiatives may establish eligibility criteria under which applications could be accepted from applicants demonstrating progress equivalent to that expected under R33.
- R 35 **Outstanding Investigator Grants**
- To provide long-term support to encourage experienced investigators with an outstanding record of research productivity to embark on long-term projects of unusual potential in a categorical program area.
- R 37 **Method to Extend Research in Time (MERIT) Award**
- To provide long-term grant support to investigators whose research competence and productivity are distinctly superior and who are highly likely to continue to perform in an outstanding manner. Investigators may not apply for a MERIT award. Program staff and/or members of the cognizant National Advisory Council/Board will identify candidates for the MERIT award during the course of review of competing research grant applications prepared and submitted in accordance with regular PHS requirements.
- R 41 **Small Business Technology Transfer (STTR) Grants - Phase I**
- To support cooperative R&D projects between small business concerns and research institutions, limited in time and amount, to establish the technical merit and feasibility of ideas that have potential for commercialization. Awards are made to small business concerns only.
- R 42 **Small Business Technology Transfer (STTR) Grants - Phase II**
- To support in-depth development of cooperative R&D projects between small business concerns and research institutions, limited in time and amount, whose feasibility has been established in Phase I and that have potential for commercialization. Awards are made to small business concerns only.
- R 43 **Small Business Innovation Research Grants (SBIR) - Phase I**
- To support projects, limited in time and amount, to establish the technical merit and feasibility of R&D ideas which may ultimately lead to a commercial product(s) or service(s).
- R 44 **Small Business Innovation Research Grants (SBIR) - Phase II**
- To support in-depth development of R&D ideas whose feasibility has been established in Phase I and which are likely to result in commercial products or services. SBIR Phase II are considered Fast-Track and do not require National Council Review.

R 55 James A. Shannon Director's Award

To provide a limited award to investigators to further develop, test, and refine research techniques; perform secondary analysis of available data sets; test the feasibility of innovative and creative approaches; and conduct other discrete projects that can demonstrate their research capabilities and lend additional weight to their already meritorious applications.

R 84 Foreign Currency Research Program (PL-480)

To support biomedical, health and behavioral science research in foreign countries. These research projects are funded by the foreign country and the Department of State.

Research-Related Programs

S 03 Minority High School Student Research Apprentice Program (NCRR)

To provide meaningful experience in various aspects of health related research in the expectation that some apprentices will decide to pursue careers in biomedical research.

S 06 Minority Biomedical Research Support - MBRS

To strengthen the biomedical research and research training capability of ethnic minority institutions, and thus establish a more favorable milieu for increasing the involvement of minority faculty and students in biomedical research.

S 07 Biomedical Research Support Grants (NCRR)

To strengthen, balance, and stabilize Public Health Service supported biomedical and behavioral research programs at qualifying institutions through flexible funds, awarded on a formula basis, that permit grantee institutions to respond quickly and effectively to emerging needs and opportunities, to enhance creativity and innovation, to support pilot studies, and to improve research resources, both physical and human.

S 10 Biomedical Research Support Shared Instrumentation Grants (NCRR)

To make available to institutions with a high concentration of NIH extramural research awards, research instruments which will be used on a shared basis.

S 11 Minority Biomedical Research Support Thematic Project Grants

To promote increased faculty and interdepartmental collaboration through programs that focus on specific research themes or scientific disciplines at developing minority institutions. These grants are intended to strengthen the biomedical research capability in defined areas and to attract other competent biomedical scientists through an improved research environment.

S 14 Minority Biomedical Research Support Grant Program for Undergraduate Colleges

To enrich the research environment at eligible undergraduate institutions with the purposes of motivating students toward biomedical research careers and providing faculty with opportunities to participate in biomedical research.

S 15 Small Instrumentation Grants Program

An institutional award to support the purchase of equipment costing no less than \$5,000 and no more than \$60,000, to be used by one or more recipients of active NIH research grants.

S 20 Specialized Integrated Core Facilities

To equip integrated non-categorical core facilities with expensive state-of-the-art instruments in a particular biomolecular area.

Training Programs

T 01 Graduate Training Programs

To assist and extend training of individuals preparing for research and academic careers in fundamental, preclinical, clinical, public health, and other disciplines related to the area of interest of the awarding Institute/Division.

T 02 Undergraduate Training Programs

To assist qualified institutions to improve and expand the training of undergraduate students in disciplines related to an area of interest of the awarding Institute/Division.

T 03 Combined Undergraduate and Graduate Training Program

To assist qualified institutions to improve and expand the training of both undergraduate and graduate students in disciplines related to an area of interest of the awarding Institute/Division.

T 09 Scientific Evaluation

To provide the chairman of the training committee funds for operation of the review group.

T 14 Conferences

For support of international and national meetings, conferences and workshops.

T 15 Continuing Education Training Grants

To assist professional schools and other public and nonprofit institutions to establish, expand, or improve programs of continuing professional education, especially for programs of extensive continuation, extension, or refresher education dealing with new developments in the science of technology of the profession.

T 16 HIV/AIDS Education for Mental Health/Substance Abuse Care Providers

Provides financial assistance to eligible organizations to train mental health/substance abuse care providers and other health care workers who are often first-line providers of mental health or substance abuse services, in order to enhance the nation's ability to impact the HIV/AIDS epidemic (Sec. 303(a)(1) of the PHS Act).

T 22 Institutional Research Fellowships

To support an institution with an approved preceptor for a number of postdoctoral research training fellowships in a limited number of specified shortage biomedical science areas.

T 23 State Manpower Development Grants (SAMHSA)

To support State agencies and sub-State entities in developing the capacity to plan, implement, and evaluate systems for manpower development.

T 32 Institutional National Research Service Award

To enable institutions to make National Research Service Awards to individuals selected by them for predoctoral and postdoctoral research training in specified shortage areas.

T 34 MARC Undergraduate NRSA Institutional Grants

To enable minority institutions to make National Research Service Awards to individuals selected by them for undergraduate research training in the biomedical and behavioral sciences.

- T 35 NRSA Short-Term Research Training**
- To provide individuals with research training during off-quarters or summer periods to encourage research careers and/or research in areas of national need.
- T 36 MARC Ancillary Training Activities (Grant) (NIGMS) <Title Revised>**
- To increase the number of well-trained minority scientists in biomedical disciplines and to strengthen the research and teaching capabilities of minority institutions through a variety of training mechanisms such as visits by experienced scientists to minority institutions or workshops/conferences designed to enhance the research training experience of students/faculty from minority institutions.
- T 37 Minority International Research Training Grants (FIC)**
- Institutional training grants awarded to domestic institutions supporting opportunities for biomedical and behavioral research training for minority students and faculty members at foreign sites.
- T 42 Educational Resource Center Training Grants (NIOSH)**
- To provide assistance to regional centers in developing specialized personnel in the occupational safety and health field with academic training, research training, and continuing education and outreach in industrial hygiene, occupational health nursing, occupational medicine, and occupational safety.
- Cooperative Agreements
- U C1 NIH Challenge Grants and Partnerships Program - Phase II - Cooperative Agreements (NIAID)**
- To promote the implementation of joint ventures between the NIH and both domestic and global entities to facilitate rapid implementation of R&D in biomedical or biotechnology projects for infectious diseases that benefit public health and have a commercial potential that otherwise could not have been attained without matching funds.
- Essential elements of grantee responsibility would include: 1) interim research and development of target goals upon whose achievement funds would be incrementally released to the awardee; 2) a single principle investigator who would be scientifically and administratively responsible for the project's research and development, and 3) a single applicant organization that would be legally and financially responsible for the funds awarded.
- U D1 Mental Health and/or Substance Abuse KD&A Cooperative Agreement (SAMHSA)**
(adjusted title and description)
- To provide support to develop new knowledge about ways to improve the prevention and/or treatment of substance abuse and/or mental illness, and to work with State and local governments as well as providers, families, and consumers to apply that knowledge effectively in everyday practice. Outcome measures are the heart and core of the KD&As, do not provide operating funds for service programs, except as required by the knowledge development activity.
- U D3 CMHS/CSAT Collaborative Demonstration Program for Homeless Individuals with Substance Abuse Disorders and Co-occurring Mental Illness--Cooperative Agreements (SAMHSA)**
- In cooperation with community-based public and private nonprofit organizations that provide treatment services to homeless individuals, to develop and test models of effective assessment and treatment for homeless individuals who suffer from substance abuse disorders and co-occurring mental illness.
- U D5 HIV/AIDS Mental Health Services Demonstration Program--Cooperative Agreements**
- In cooperation with eligible organizations, to provide mental health services to people affected by or living with HIV/AIDS; to evaluate the effectiveness and efficiency of different approaches used to organize and provide those services; and to determine the impact of those services on the quality of life of the individuals served. CMHS will also award one cooperative agreement to a recipient that will design and implement the overall evaluation of this program, as well as provide the overall coordination and management of the program's data (Sec. 520(b), 501 of the PHS Act).

- U D6 Demonstration for Prevention of Substance Abuse Among High-Risk Youth--Cooperative Agreements**
- In cooperation with public and private nonprofit organizations, to support client-oriented demonstration projects, replication of models, in prevention of alcohol, tobacco, and other drug abuse among high-risk youth; programs will be targeted toward decreasing incidence and prevalence, identifying risk factors, and increasing resiliency and protective factors to reduce risk. For discretionary grant programs, use the HD1. (Sec. 509(a) of the PHS Act; A Anti-Drug Abuse Act of 1986, S.4005, P.L. 100-690.)
- U D7 Employment Intervention Demonstration Cooperative Agreements**
- In cooperation with state and local governments and private nonprofit agencies, to support the implementation and evaluation of promising employment intervention programs in order to generate knowledge about effective approaches for enhancing competitive employment for adults with severe mental illnesses.
- U D8 Development and Implementation of Criminal Justice Treatment Networks Demonstration--Cooperative Agreements**
- In cooperation with public and private nonprofit organization, to support the planning and implementation of criminal just treatment networks comprising a partnership of criminal justice substance abuse treatment, primary health and mental health care, and allied social services agencies in the following three offender populations: Adult females, juveniles and adult males. Networks will link existing criminal justice-primary care-substance abuse treatment partnerships into a comprehensive continuum of services. (Sec. 511 of the PHS Act).
- U D9 CMHS/CSAT Collaborative Demonstration Program to Prevent Homelessness--Cooperative Agreements**
- In cooperation with eligible public and private nonprofit and for-profit organizations, to support projects to document and evaluate appropriate homelessness prevention interventions for individuals with serious mental illness and/or substance abuse disorders, who were formerly homeless or at risk for homelessness. (Sec. 501(d) of the PHS Act).
- U H1 HBCU Research Scientist Award**
- To assist HBCUs in strengthening and augmenting their human resources by recruiting an established research scientist; to enhance the career of the recruited research scientist; and to strengthen other HBCU resources for the conduct of biomedical and/or behavioral research. The recruited research scientist must have received competitive and independent research support.
- U R1 Cooperative Agreements for Resources and Technical Assistance Projects and Centers to Support Mental Health and Substance Abuse Services**
- In cooperation with eligible organizations, to support technical assistance and resources development projects or centers related to mental health and substance abuse services, and to develop practical materials and efficient and effective methods for providing resources and training to mental health and substance abuse professionals. (Sec. 565(b) of the PHS Act)
- U R4 The Effectiveness for Cannabis (Marijuana) Dependency--Cooperative Agreements**
- In cooperation with public and private nonprofit and for-profit organizations, to test and evaluate in adults or adolescents the efficacy of various treatments for marijuana dependency, including multisite studies with coordinating centers that will evaluate a variety of interventions and treatments and provide validated models of these interventions. (PHS Act, section 501d5)
- U R5 Evaluating Utility and Cost Effectiveness of Wrap Around Services for Clients in Non-Residential Substance Abuse Treatment Programs--Cooperative Agreements**
- In cooperation with public and private nonprofit and for-profit organizations, to research the relative impact of wrap around services on the successful treatment of addictive disorders, and the relative cost-effectiveness of these services in light of changes in health care financing, including managed care, as they relate to substance abuse treatment, in order to determine what range of wrap around services improves outcome, and at what cost.
- U R6 Prevention Intervention Research on Substance Abuse in Children--Cooperative Agreements**
- In cooperation with public and private nonprofit and for-profit organizations, to support research to determine the most effective interventions to change the developmental course of early predictor markers for substance abuse in children at several defined developmental stages.

- U R7 Managed Care and Vulnerable Populations--Cooperative Agreements**
- In cooperation with public and private nonprofit and for-profit organizations, to support research to enhance knowledge about how managed care in the public sector affects the provision of substance abuse and mental health services.
- U 01 Research Project--Cooperative Agreements**
- To support a discrete, specified, circumscribed project to be performed by the named investigator(s) in an area representing his specific interest and competencies.
- U 09 Scientific Review and Evaluation--Cooperative Agreements**
- To provide the chairman of an initial review group funds for operation of the review group.
- U 1D Invention Model for HIV/AIDS High-Risk Behavior Prevention for Adolescents and Women--Cooperative Agreements**
- In cooperation with eligible recipients, to support study sites or coordinating centers that will develop and do pilot testing on a model prevention intervention approach to encourage and enable adolescents, young adults or women who engage in high-risk behaviors associated with human immunodeficiency virus/acquired immune deficiency syndrome (HIV/AIDS) transmission to change these behaviors. (PHS Act, Section 501d5)
- U1E Effectiveness of Housing Approaches for Persons With Serious Mental Illness--Cooperative Agreements**
- In cooperation with eligible recipients, to support study sites or coordinating centers that will evaluate the effectiveness of different housing approaches for persons with serious mental illness. Study site grantees will evaluate two or more different housing approaches, and will work with coordinating centers to develop a common protocol for cross-site studies; later, individual study sites will be evaluated using these tools. (PHS Act, Section 501d5)
- U1F Substance Abuse Prevention: Assessment and Coordination of Information and Technologies--Cooperative Agreements (SAMHSA)**
- In cooperation with eligible State and Tribal governments, to compile, coordinate and apply information and new technologies about substance abuse prevention so that the optimal strategy and use of resources is deployed within a community, and so that local citizens are more effectively mobilized (the State Incentive Program). (PHS Act, Sec., 501d(5))
- U1G Criminal Justice Interventions Involving Co-occurring Mental Illness and Substance Abuse Disorders--Cooperative Agreements (SAMHSA)**
- In cooperation with State and local governments, community organizations, or other eligible recipients, to support studies and evaluations of the relative effectiveness of pre- and post- booking police/justice interventions for individuals with co-occurring serious mental illnesses and alcohol or other drug use disorders. Programs will involve study sites with coordinating centers; primary outcomes to be assessed include criminal recidivism, time incarcerated, psychiatric status, functional status, continuity of participation in treatment, homelessness, emergency treatment utilization, and frequency of substance abuse. (PHS Act, Sec. 501d(5))
- U1H Integration of Mental Health and Substance Abuse Prevention or Treatment with Primary Health Care--Cooperative Agreements (SAMHSA)**
- In cooperation with State and local governments, community organizations, or other eligible recipients, to support development of knowledge about, and evaluate the effectiveness of the integration of mental health services or substance abuse prevention or treatments with primary care service settings, and the comparison of such integrated services with standard community care. Programs will involve study sites with coordinating centers (Starting Early - Starting Smart (SESS) program). (PHS Act, Sec. 501d(5)).
- U1J Substance Abuse Centers for the Application of Prevention Technologies--Cooperative Agreements (SAMHSA)**
- In cooperation with eligible recipients, to develop and operate regional Centers for the Application of Prevention Technologies (CAPT) which will assist the States to consistently apply and coordinate the latest research knowledge to substance abuse prevention programs, practices, and policies using both conventional and electronic delivery methods.

- U1K Workplace Manage Care for Substance Abuse Prevention and Early Intervention--Cooperative Agreements (SAMHSA)**
- In cooperation with public and private nonprofit and for-profit organizations, to build a cooperative strategy among groups involved in workplace managed care substance abuse prevention and early intervention programs, identifying effective components and strategies of such programs and disseminating these findings. (PHS Act., Sec. 501d(5)).
- U 1S Emergency Disaster Relief Relating to SAMHSA Programs -Cooperative Agreements**
- In cooperation with eligible State health departments, to provide assistance to States impacted by designated natural disasters to assess the health threats and address health issues associated with the disaster, and to restore SAMHSA-related public health programs that were impacted by the disaster. (Sec. 319 of the PHS Act.)
- U 10 Cooperative Clinical Research--Cooperative Agreements**
- To support clinical evaluation of various methods of therapy and/or prevention in specific disease areas. These represent cooperative programs between sponsoring institutions and participating principal investigators, and are usually conducted under established protocols.
- U 13 Conference--Cooperative Agreements**
- To support international, national or regional meetings, conferences and workshops where substantial programmatic involvement is planned to assist the recipient.
- U 18 Research Demonstration--Cooperative Agreements**
- To provide support for testing, by means of a research design, the effectiveness of the transfer and application of techniques or interventions derived from a research base for the control of diseases or disorders or for the promotion of health. The project should be capable of making conclusions which are generalizable to other sites. These are usually cooperative programs between participating principal investigators, institutions, and the sponsoring Institute(s).
- U 19 Research Program--Cooperative Agreements**
- To support a research program of multiple projects directed toward a specific major objective, basic theme or program goal, requiring a broadly based, multidisciplinary and often long-term approach. A cooperative agreement research program generally involves the organized efforts of large groups, members of which are conducting research projects designed to elucidate the various aspects of a specific objective. Substantial Federal programmatic staff involvement is intended to assist investigators during performance of the research activities, as defined in the terms and conditions of award. The investigators have primary authorities and responsibilities to define research objectives and approaches, and to plan, conduct, analyze, and publish results, interpretations and conclusions of their studies. Each research project is usually under the leadership of an established investigator in an area representing his/her special interest and competencies. Each project supported through this mechanism should contribute to or be directly related to the common theme of the total research effort. The award can provide support for certain basic shared resources, including clinical components, which facilitate the total research effort. These scientifically meritorious projects should demonstrate an essential element of unity and interdependence.
- U 2T Substance Abuse System Technical Assistance to States Through NASADAD --Cooperative Agreements**
- In cooperation with the National Association of State Alcohol and Drug Abuse Directors (NASADAD), to provide technical assistance to States in their efforts to establish, improve, and maintain viable and effective substance abuse prevention and treatment service systems that meet the needs of clients, especially in light of major changes to the health care delivery financing and systems, as well as increasing Federal emphasis on performance and outcome measurements. The assistance could include synthesis and dissemination of information; related policy analyses; and analysis and utilization of data. (PHS Act, Section 1948a)

- U 24 **Resource-Related Research Projects--Cooperative Agreements**
- To support research projects contributing to improvement of the capability of resources to serve biomedical research.
- U 41 **Biotechnology Resource--Cooperative Agreements**
- To support biotechnology resources available to all qualified investigators without regard to the scientific disciplines or disease orientations of their research activities or specifically directed to a categorical program area.
- U 42 **Animal (Mammalian and Nonmammalian) Model, and Animal and Biological Materials Resource Cooperative Agreements (NCRR)**
- To develop and support animal (mammalian and nonmammalian) model, or animal or biological materials resources available to all qualified investigators without regard to the scientific disciplines or disease orientations of their research activities or specifically directed to a categorical program. Nonmammalian resources include nonmammalian vertebrates, invertebrates, cell systems, and nonbiological systems.
- U 43 **Small Business Innovation Research (SBIR) Cooperative Agreements - Phase I**
- To support projects, limited in time and amount, to establish the technical merit and feasibility of R&D ideas that may ultimately lead to commercial products or services.
- U 44 **Small Business Innovation Research (SBIR) Cooperative Agreements - Phase II**
- To support in-depth development of R&D ideas whose feasibility has been established in Phase I and that are likely to result in commercial products or services.
- U 45 **Hazardous Waste Worker Health and Safety Training Cooperative Agreements (NIEHS)**
- To develop, implement, and evaluate programs to train workers who are or may be engaged in activities related to hazardous waste removal, containment, or emergency response.
- U 54 **Specialized Center--Cooperative Agreements**
- To support any part of the full range of research and development from very basic to clinical; may involve ancillary supportive activities such as protracted patient care necessary to the primary research or R&D effort. The spectrum of activities comprises a multidisciplinary attack on a specific disease entity or biomedical problem area. These differ from program project in that they are usually developed in response to an announcement of the programmatic needs of an Institute or Division and subsequently receive continuous attention from its staff. Centers may also serve as regional or national resources for special research purposes, with funding component staff helping to identify appropriate priority needs.
- U 69 **AIDS National Education and Training Centers--Cooperative Agreements**
- To provide assistance to health profession schools, hospitals, health departments and other organizations to develop AIDS National Education and Training Centers which will provide training for health care personnel in the care of people with AIDS and other conditions related to infection with the Human Immunodeficiency Virus (HIV).
- U 70 **Cuban/Haitian Residential Psychiatric Care**
- In cooperation with residential care facilities, to provide necessary residential psychiatric treatment for Cuban and Haitian entrants. Such services will include all necessary treatment modalities plus acculturation services.
- U 76 **Area Health Education Centers--Cooperative Agreements**
- To support projects to improve the supply, quality, utilization, and efficiency of health personnel in the health services delivery system; encourage regionalization of educational responsibilities of the health professions schools; to prepare individuals subject to a service obligation under the National Health Service Corps scholarship program to effectively provide health service in health manpower shortage areas.

U 79 **Mental Health and/or Substance Abuse Services Cooperative Agreements (SAMHSA)**

To support the provision of mental health and/or substance abuse prevention and treatment services. These are cooperative programs between participating principal investigators. Organizations and sponsoring Centers and where substantial programmatic involvement is planned to assist the recipient.

U 88 **Services Demonstration--Cooperative Agreements**

To support the providing and evaluating of new methods or approaches, based on the best available knowledge, of health service (including treatment) or prevention activities, or for assessing the feasibility of an intervention or approach to service delivery. These are usually cooperative programs between participating principal investigators, institutions and the sponsoring Institute(s).

U 94 **Cooperative Agreements: Addiction Treatment and Recovery Systems for Rural, Remote, and Culturally-Distinct Populations (SAMHSA)**

In cooperation with State and territorial agencies and tribal organizations to improve the availability, accessibility, and effectiveness of drug treatment and recovery services for individuals with culturally-distinct characteristics (e.g., Native Americans, Alaska Natives, Native Hawaiians, recent immigrants, farm workers) and who reside in areas that are rural, remote, or geographically isolated.

U 97 **Cooperative Agreements: Technical Assistance Centers for the Evaluation of Mental Health System Change (SAMHSA)**

In cooperation with State mental health agencies, for States and other organizations receiving funds from the Community Mental Health Service Block Grant (B09), to provide technical assistance centers for the design and implementation of evaluations of changes in their systems of care.

Inter-Agency/Intra-Agency Agreements

Y 01 **NIH Inter-Agency Agreements**

A written, reimbursable agreement by which a component of the NIH provides funds to another Federal organization outside the DHHS agency, to acquire specific products, services, or studies.

Y 02 **NIH Intra-Agency Agreements**

A written, reimbursable agreement by which a component of the NIH provides funds to another NIH component or to another organization within the DHHS, to acquire specific products, services, or studies.

SECTION III - DEPT. OF HEALTH & HUMAN SERVICES ACTIVITY CODE LISTING

TABLE 10

CURRENT DHHS ACTIVITY CODE LIST

This list includes all Activity Codes currently being used by the Department of Health and Human Services, their titles and the organizations which initiated each code.

Activity	Title	Initiating Code Organization
A03	General Purpose Traineeship Grants to Schools of Public Health	BHP
A11	Professional Nurse Traineeship	DN/BHP
A19	Traineeships for Students in Other Grad. Prog.	BHP
A22	Nurse Anesthetist Traineeship Program	DN/BHP
A24	Minority Faculty Fellowship Program (MFFP)	BHP
A99	Training of Indian Health Personnel	BHP
B01	Preventive Health Services	CC/PRVS
B04	Maternal and Child Health Services	MCHS
B08	Substance Abuse Prevention and Treatment Block Grant	TI
B09	Mental Health Services Block Grant	SM
C06	Cancer Research Facilities	CA
C08	Tertiary Perinatal Facil. Construction	HF
C15	National Center for Primary Care-Construction Project	DGPO
C76	AIDS Public Medical Facility Construction and Modernization	HF
D03	Rural Health Outreach Demonstration Program	CS/BPHC
D10	Nursing Special Project Grants	DN/BHP
D15	Grants for Training in Family Medicine	DM/BHP
D18	Special Health Career Opportunity Grants	MB/BHP
D19	Grants for Utilization of Nursing Educational Talent	DN/BHP
D21	Programs for Training of Physicians Assistants	PE/BHP
D23	Advanced Nurse Education Programs	DN/BHP
D24	Nurse Practitioners Training Program	DN/BHP
D25	Development Grants for Indian Health Services or Facilities	IS
D28	Residency Training in Gen. Internal Medicine General Pediatrics	DM/BHP
D30	Grants for Residency Training: General	DH/BHP
D31	Curriculum Development Grants	BHP
D32	Establishment of Departments of Family Medicine	DM/BHP
D33	Preventive Medicine Residency Training Grants	PE/BHP
D34	Centers for Excellence in Minority Health Education Practice of Dentistry	MB/BHP
D35	AIDS Regional Education and Training Centers	MB/BHP
D36	Interdisciplinary Training For Health Care for Rural Areas	AH/BHP
D37	Allied Health Special Project Grants	AH/BHP
D38	Public Health Special Projects	AH/BHP
D39	Health Education and Training Centers (HETC) Programs	PE/BHP

Activity	Title	Initiating Code Organization
D41	Reduction of Hospitalizations Due to Diarrheal Disease in Children, Training Demonstration Grants	CC
D42	replaced-see inactive list	
D43	International Training Grants in Epidemiology	TW
D45	Junior National Health Service Corps/Health Careers Opportunity Program Demonstrations	CS
D53	AIDS Risk Factor Reduction in Minority Groups Demo. Grants	MP
D56	Bilingual/Bicultural Minority Health Services Demo. Project	MP
D57	HIV/AIDS Bilingual/Bicultural Minority Health Services Demo. Project	MP
D68	AIDS: Community Coalition Demonstration Projects for Health and Human Services to High-Risk Minority Males	MP
D77	Hispanic/Latino Community Health Coalition Devl. Projects	MP
D78	HIV/AIDS: Hispanic/Latino Community Health Coalition Development Projects	MP
D91	Health Prof. Recruitment Prog. for Indians	IS
F05	International Fellowships	TW
F07	NIH-French CNRS Program for Scientific Collaboration	TW
F06	Senior International Fellowships	TW
F15	Fogarty International Scholarships	TW
F18	Preparatory Scholarships for Indians	IS
F19	Indian Health Scholarships	IS
F20	Foreign Funded Fellowships	TW
F21	Health Professions Pregraduate Scholarships for Indians	IS
F29	Matching Grants to Indian Tribes for Health Professions Scholarship Programs	IS
F30	Individual Predoc. NRSA for MD-PhD Fellowships	AD
F31	Predocctoral Individual National Research Service Award	OD/NIH
F32	Postdoctoral Individual National Research Service Award	OD/NIH
F33	National Research Service Award for Senior Fellows	OD/NIH
F34	MARC (NRSA) Faculty Fellowships	GM/NIH
F35	Intramural NRSA Individual Postdoctoral Program Appointees	OD/NIH
F36	MARC Visiting Scientists Program (Grants)	GM
F37	Medical Informatics Fellowships	LM
F38	Applied Medical Informatics Fellowships	LM
G07	Resources Improvement Grant	LM
G08	Resources Project Grant	LM
G11	Extramural Associate Research Development Award (EARDA)	NIH
G12	Research Centers in Minority Institutions Award	RR
G13	Health Sciences Publication Support Awards (NLM)	LM
G20	Repair/Renov./Moderniz'n, Existing Res. Facil	RR
G93	Compacts for IHS Funding to Tribes	IS
G94	Administrative Support for Public Health Service Agency Foundations	CC
HD1	Demo. for Prevention of Alcohol and Other Drug Abuse Among High-Risk Youth	SP
HD2	Demo: Model Substance Abuse Projects for Pregnant/Postpartum Women and Their Infants	SP
HD3	Alcohol and Drug Abuse Demo: Community Youth Activity Program	SP
HD4	Drug Use/Alcohol Abuse Prevention Demo: Community Partnership Study	SP
HD5	Demo: Community-Based Mental Health Service for Adults with Serious Mental Illness and Children with Serious Emotional Disturbances	SM

Activity	Title	Initiating Code Organization
HD7	Demo: Model Compr. Drug Abuse Treatment Program for Critical Population	TI
HD8	Demo: Residential Drug Treatment Program for Women and Their Children	TI
HD9	Mental Health and/or Substance Abuse Services Demonstration Grants	SM/SP/TI
HR1	State Mental Health and Substance Abuse Data	SM/SP
HR2	Addiction Treatment Capacity Expansion Program	TI
HS1	Model Comprehensive Substance Abuse Treatment Programs for Correctional Populations	TI
HS2	Model Comprehensive Substance Abuse Treatment Non-Incarcerated Criminal and Juvenile Justice Populations	TI
HS3	Model Comprehensive Residential Drug Abuse Prevention and Treatment Projects for Substance-Using Women and Children	SP
HS4	Residential Treatment Program for Pregnant and Postpartum Women	TI
HS5	Child Mental Health Services Initiative: Comprehensive Community Mental Health Services for Children and Adolescents with Serious Emotional Disturbances	SM
HS6	Managed-Care Models for SSI Beneficiaries Disabled Due to Alcohol or Other Drug Addiction	TI
H07	Mental Health Disaster Assistance	SM
H08	Health Services Delivery to AIDS Victims--Demonstration	BR/BRD
H09	Pacific Basin Health Services Projects	CS/BPHC
H1A	Demo. Grants to States for Community Scholarship Programs to Increase Primary Health Care Services in HPSAs	CS/BPHC
H1B	Health Services to Residents of Public Housing	CS/BPHC
H1C	Native Hawaiian Health Centers	CS/BPHC
H1D	Tribal Demo. Proj.: Diabetes Health Services for American Indians/Alaskan Natives	IS
H1E	Mat. and Child Health Community Integrated Service Systems	MC/MCH
H1F	National Infant Immunization Coalition	CC
H1G	Data Management Capacity Building Grants for Preventive Health/Health Services Block Grant Recipients	CC
H1H	Indian Child Protection/Child Abuse Prevention Demonstration Project for Mental Health and Social Services for American Indians/Alaska Natives	IS
H1J	Improving Emergency Medical Services Trauma Care in Rural Areas	BR/BRD
H1K	State Demonstration Project on Alzheimer's Disease or Other Related Disorders	CS/BPHC
H1L	Urban Indian Health Services	IS
H1M	Tribal Recruitment and Retention of Health Professionals into Indian Health Programs	IS
H1N	HIV/AIDS Community-Based Outreach and Intervention Demonstration Program for Substance Abusers	SP
H1P	Nursing Education Loan Repayment Program	CS/BPHC
H1Q	Grants for Disaster Relief Relating to CDC Programs	CC
H1R	Disaster Assistance for Primary Care Services/Facilities	CS/BPHC
H1S	Grants for Disaster Relief Relating to SAMHSA Programs	SM/SP/TI
H1T	Field-Initiated Projects in Minority Health: HIV/AIDS	MP
H1U	Field-Initiated Projects in Minority Health	MP
H1W	Increasing Availability of 911 Emergency Telephone Number, State Grants	BR
H1X	Adoles. Health Services Centers for American Indians/Alaska Natives	IS
H12	Pediatric AIDS Health Care Demonstration Program	MC
H13	Conferences	SP
H15	Emergency Medical Services for Children	MC
H2A	Rural Telemedicine Grant Program	CS
H2B	Hansen's Disease National Ambulatory Care	CS

Activity	Title	Initiating Code Organization
H2C	Technical Assistance for Tribal Management of Health Services for Indians	IS
H2D	BPHC/MCHB Healthy Schools, Health Communities Services Program	CS
H2F	Disadvantaged Health Professions Faculty Loan Repayment Program	DD
H2N	Demonstration: Linking Community-Based Primary Care, Substance Abuse, and HIV/AIDS Treatment Services	TI/CS
H20	Community Health Centers	CS/BPHC
H23	Immunization Program	CC
H25	Venereal Disease Control	CC
H27	Community Health Centers	CS
H28	State and Community-Based Injury Control Programs	CC
H30	Comprehensive Hemophilia Diagnostic and Treatment Centers	MC
H34	Applied Methods in Injury Surveillance	CC
H37	Coal Miners' Respiratory Impairment Treatment Program	CS
H39	Expansion Grants for Assistance to Organ Procurement Organizations	OT
H46	Genetic Disease Testing and Counseling Services	MC
H52	AIDS Hemophilia Diagn./Treatment Services	MC
H53	Immunization Demonstration Project: Influenza Vaccination	CC
H56	State Education Loan Repayment Program	CS
H57	Indian Health Service Loan Repayment Program	IS
H58	National Health Service Corps Loan Repayment Program	NC/BPHC
H59	Adolescent Family Life Demonstration Projects	AP/OPA
H62	Services or Education on AIDS	CC
H64	State and Community-Based Childhood Lead Poisoning Prevention Program	CC
H65	Home Health Services	CS/BPHC
H66	Home Health Services for the Homeless	CS/BPHC
H67	Conferences on Minority Male Health and Human Services Issues	MP
H68	Technical/Nonfinancial Assistance to Community Health Centers	CS
H69	Integrated Community-Based Primary Care and Drug Abuse Treatment--HIV Demonstration Grants	CS/BPHC
H70	Health Services for Family Planning	FP/OPA
H71	Health Programs for Refugees	CC
H72	Urban Indian Alcohol and Substance Abuse Services	IS
H73	Tribal Demonstration Projects: Adolescent Health Services for American Indians/Alaska Natives	IS
H74	IHS Mental Health Management Development Program	IS
H75	Health Investigations/Assessments of Control/Preven. Methods	AT/CC
H76	Prevention and Primary Health Care Services in Community Health Facilities to Persons with HIV Infection and/or AIDS	CS/BPHC
H77	Subacute Care for AIDS Patients--Demonstration Grants	BR/BRD
H79	Mental Health and/or Substance Abuse Services Grants	SP/SM/TI
H86	Prevention Grants	SP
H87	Treatment Grants	TI
H89	HIV Emergency Relief Project Grant Program	BR/BRD
H93	Special Health Services Demonstrations	MC
H94	Rural Health Services Demonstration Project	HA
H95	Support of State Initiative Demonstration Program	CS
H96	Healthy Start Initiative Demonstration Program	MC
H97	Special Projects of National Significance	BR/BRD
H98	Urban Indian Mental Health Services	IS
H99	"Transition" AIDS Program Priority--Special Projects of National Significance	BR/BRD
J99	Joint Funded Project	PHS

TABLE 11**INACTIVE DHHS ACTIVITY CODE LIST**

This list includes all activity codes known to have been used by the Department of Health and Human Services but are not currently being used. The table lists the title and the organization which initiated the code.

Activity	Title	Initiating Code	Organization
A01	Traineeship Awards to Individuals		
A02	Allied Health Professions Traineeship Grants for Advanced Training	BHP/HRSA	
A04	Special Purpose Traineeship Grant	BHP/HRSA	
A05	Public Health Nursing Traineeship Grants to Colleges and Universities		
A06	Traineeship Grants for Short-term Training	AH	
A07	Apprenticeship Training in a Health Profession	BHP/HRSA	
A08	Residency Traineeship Grants in Preventive Medicine and Dentistry	BHP/HRSA	
A10	Environmental Health Traineeship Grants		
A12	Professional Nurse Traineeship Program		
A13	Allied Health Professions Grants for Training Institutes	BHP/HRSA	
A14	Occupational Safety/Health Professions Grants for Training Institutes	OH	
A15	Training/Traineeships for Health Professions Teaching Personnel	PE	
A16	Nurse Practitioner Traineeship	BHP/HRSA	
A17	Continuing Education Training Program	DH	
A18	Training in Emergency Medical Services	DM	
A20	Training of Indian Sanitation Personnel	IS	
A21	Nurse Practitioner Traineeship, Health Manpower Shortage Area	NU	
A23	Post-Baccal. Faculty Fellow. Grant Program	AH	
B02	Alcohol, Drug Abuse and Mental Health Services	AD	
B03	Primary Care Services Block Grant	CS	
B05	Emergency Substance Abuse Treatment and Rehab. Block Grants	AD	
B06	Mental Health Services for the Homeless	AD	
B07	Community Youth Activity Program	SP	
C01	Health Research Facilities		
C02	Nonmatching Construction		
C03	Community Mental Health Facilities	MH	
C04	Narcotic Addict Treatment Facilities		
C05	Educational and Research Facilities Construc.	MB/PE	
C07	Community Mental Health Facilities Assist.	MH	
C10			
C11	Indian Health Care Facilities IS		
C12	Indian Sanitation Facilities	IS	
C45	Construction Assistance from the Job Opportunities Program	HF/IS	
C60	Health Care Facilities	HF/IS	
C61	D.C. Medical Facilities	CS	
C62	Appalachian Supplemental Construction Program	CS	
C63	Economic Development Project Facilities	HF	
C64	Safeguard IMPACT Construction Assistance	HF	
C65	Four Corners Reg'l Commis. Construction Assistance	HF	
C66	Public Medical Facility Const. and Modernization	HF	
C67	Health Professions Teaching Facilities	HF	
C86	Mary B. Randolph Cancer Center	DG	

Activity	Title	Initiating Code Organization
C98		
C99		
D01	Studies and Demonstration in Health Planning (on IMPAC as:	
	Allied Health Professions Spec. Improvement)	CP/BHP
